LieberLieber Software: SDC Systems distributes LemonTree in the UK

With the new partner SDC Systems LieberLieber strengthens its distribution in the UK and Ireland. SDC Systems has a large base of Enterprise Architect users and includes LemonTree and codeBeamer Connector for Enterprise Architect in its portfolio.

VIENNA/HERTFORDSHIRE

Despite the challenging environment due to the Corona Pandemic, 2020 was a successful year for Lieber Lieber. Once again, the growing interest of the industry for the top product LemonTree was confirmed, also a new release is about to be published. With SDC Systems, a new partner focussed on the embedded systems market where the Enterprise Architect modelling platform is widely used aross the UK and Ireland.

FOCUS ON LEMONTREE AND CODEBEAMER CONNECTOR

LemonTree is the plug-and-play product for model versioning (diff and merge), and has already enjoyed growing popularity among the target group for five years. Lemon-Tree comprehensively improves the work of a distributed modelling team and supports compliance with prescribed standards such as ISO 26262, giving models the same life cycle as other artefacts such as software. LemonTree enables the understanding of changes between individual model versions, which is important for reviews. A new release with important improvements is already in the pipeline and will be presented soon.

Stuart Parker
Managing Director
SDC Systems

SDC Systems are excited to add the Lieber Lieber modelling products to our range of software process and analysis tools for distribution in the UK and Ireland. We see a large market with Enterprise Architect users in our customer base and look forward to introducing them to the LemonTree model versioning tool, as well as the EA Connector for Intland codeBeamer. The software tools we distribute are particularly well suited to the development of highly complex embedded systems, often with regulatory certification needs, and the LieberLieber products fit well in this customer environment.

In early 2020, LieberLieber and Intland Software introduced codeBeamer Connector for Enterprise Architect. This integration allows users to synchronise requirements, model attributes as well as links and references between codeBeamer ALM and Enterprise Architect. Now it is even easier to navigate back and forth between the two platforms while development data is automatically synchronised.

Dr. Konrad Wieland
CEO of LieberLieber

We are pleased to have gained an experienced partner in the important UK and Irish market with SDC Systems. SDC Systems has a lot of experience with embedded systems customers where Enterprise Architect is popular and can now complement its portfolio with LemonTree and codeBeamer Connector. This allows us to further deepen our cooperation with customers and to open up completely new buyer groups. We are always available to SDC Systems and its customers with advice and support and look forward to joint successes!

ABOUT SDC SYSTEMS

SDC Systems was founded in 2002 and are focussed on the embedded systems market in the UK and Ireland. SDC Systems provides a portfolio of essential tools, technologies and services to enable organisations to deliver safe and secure applications both quickly and cost effectively. Our business has been built on the concept of sourcing, understanding and combining new technologies to enhance and accelerate our client's business performance. We assist our clients in adopting these technologies, as well as providing full integration, deployment, support and additional engineering services.

ABOUT LIEBERLIEBER SOFTWARE

We are a software engineering company. The know-how of our employees lies in model-based software and system design based on tools such as Enterprise Architect from Sparx Systems.

Our customers are companies that place particular importance on the quality of their software and systems development. They wish to maintain a constant overview of their complex development scenarios while ensuring that security-relevant requirements are clearly represented in models.

For this task we provide our own special tools, such as LemonTree and Embedded Engineer. In addition, we offer a range of useful tool integration services to help make our customers' development processes more productive.
