# LieberLieber Software: Emerasoft distributes LemonTree in Italy

As a consequence of the great demand, LieberLieber LemonTree is conquering the Italian market with the support of a local partner. Together with Profesia, the Turin-based software specialist Emerasoft is an important partner of Sparx Systems (Enterprise Architect) in Italy. Now the company will also distribute LemonTree as a partner of LieberLieber.

## **VIENNA/TURIN**

The industry's interest in LieberLieber LemonTree, the revolutionary tool for merging different model versions, continues to grow. Companies such as Bosch, Deutsche Bahn, Hima, Infineon, Schaeffler, Valeo, VW, ZF Friedrichshafen are already among the most well-known customers. Just in time for the presentation of LemonTree 2.5, a partner has now been found in Emerasoft for the increased distribution in the Italian market.

## **LEMONTREE 2.5: FURTHER IMPROVEMENTS CONSOLIDATE MARKET SUCCESS**

LemonTree is the plug-and-play model versioning (diff and merge) product that revolutionizes the work of a distributed modeling team and helps them comply with required standards such as ISO 26262. Models are thus given the same life cycle as other artifacts, such as software. LemonTree enables the understanding of changes between model versions, which is important for reviews.

**Riccardo  
Bernasconi**  
CEO of Emerasoft

We are happy to announce the partnership with LieberLieber for the Italian distribution of the Lemon Tree product. With this partnership Emerasoft will be able to strengthen its position in the software and systems modeling market by providing its customers with the opportunity to integrate powerful versioning functions with the high modeling capabilities of the Enterprise Architect tool.

With the latest release LemonTree 2.5, the tool is now directly integrated into Enterprise Architect and supports basic Git functions. In addition, a specially developed ISO 26262 Certification Kit is available, which makes certification much easier for companies.

**Dr. Konrad Wieland**  
CEO of LieberLieber

We are pleased to have Emerasoft as a strong LemonTree partner in the Italian market, with whom we can better develop this interesting country. We are sure that software and system modeling will become more and more widespread in Italy and that we can offer an excellent solution with Enterprise Architect and LemonTree

### ABOUT EMERASOFT

Emerasoft, a Lynx Group SpA company, is an Italian company offering IT solutions in various sectors. It was founded in 2005 and supports companies in the areas of software engineering, DevSecOps, application security and digital onboarding for web applications. Emerasoft's mission is to develop, select and integrate the best technologies for customer satisfaction to improve team collaboration.

### ABOUT LIEBERLIEBER SOFTWARE

We are a software engineering company. The know-how of our employees lies in model-based software and system design based on tools such as Enterprise Architect from Sparx Systems.

Our customers are companies that place particular importance on the quality of their software and systems development. They wish to maintain a constant overview of their complex development scenarios while ensuring that security-relevant requirements are clearly represented in models.

For this task we provide our own special tools, such as LemonTree and Embedded Engineer. In addition, we offer a range of useful tool integration services to help make our customers' development processes more productive.
